Danilo Yamazaki Bossolani

Junior Developer · Java · Spring Boot · Applied AI

I build backends in **Java and Spring Boot with PostgreSQL**, and also work with **Node.js and TypeScript**. Since August 2026 I've been freelancing, shipping software to real clients from requirements to deployment. I'm finishing an associate degree in Systems Analysis and Development (**expected June 2027**) and looking for my first junior role.

USED BY A CLIENT
Java/Spring system with 72 tests and CI that tracks judicial-auction properties

GROUNDED AI
RAG assistant on pgvector that answers only from catalog data

REMOTE-READY
GMT-3, overlaps US business hours · contractor or full-time

EXPERIENCE

Freelance Developer · Self-employed · remote
Aug 2026 – present

I handle scope, timeline, development, deployment and support directly with each client.

> **Judicial Property Pipeline** · custom system
> `Java 21 · Spring Boot · JPA · Flyway · PostgreSQL · Docker · Thymeleaf · Playwright`
> *github.com/danilobossolani/judicial-property-pipeline*
>
> - Automatically collects judicial-auction listings from about 10 public sources, each isolated in its own provider, so one failing source never stops the others.
> - Duplicate detection, filters (city, neighborhood, status), tracking of auction rounds and prices, and an audit center logging every collection run.
> - 72 automated tests (JUnit 5 and Mockito) running in GitHub Actions CI on every push and PR.

> **Ateliê Chris Camacho website** · ceramics studio, São Paulo
> `React · Vite · Cloudflare Workers`
> *atelierccamacho.com.br*
>
> - A page per activity (dinners, classes, decals) with FAQs and WhatsApp contact using pre-filled messages; static site with a strict CSP, deployed on Cloudflare.

After-sales Assistant · Óticas Prevent (optical retail) · Brazil
Oct 2025 – May 2026

- After-sales and customer service in a high-traffic, target-driven store; kept customer records up to date.

PROJECTS

AutoStore AI
2026

`Node.js · TypeScript · Express · PostgreSQL · pgvector · Gemini API`
github.com/danilobossolani/car-store-rag · built as a take-home test for a hiring process

- Car catalog with lead capture in PostgreSQL and a RAG-based AI assistant.
- Embeddings in pgvector with cosine-distance search; the assistant answers only from catalog data and keeps conversation history. 17+ commits using Conventional Commits.

+party
2026 · in progress

`Angular 22 · TypeScript · SCSS · Bootstrap 5 · Supabase · Figma`
github.com/PedroLima-07/Startup-PlusParty · Startup One course project (FACENS), team of 5 using Scrum and Trello

- Digital tab app for bars, from ordering to payment, with areas for customers, staff and managers. Praised by the course professors.
- One of the developers responsible: I led the landing page and contribute across the rest of the system.

STACK

Daily use	Java 21 · Spring Boot · JPA · PostgreSQL · SQL · Node.js · TypeScript · Express · Git/GitHub · Docker
Used in projects	React · Angular · MongoDB · pgvector · Thymeleaf · Playwright · Python/FastAPI · Power BI · GitHub Actions · Tailwind · Bootstrap
AI-assisted dev	Claude Code daily, always reviewing generated code · LLM integration via API (Gemini, RAG on pgvector) · Prompt Engineering course (DIO/Bradesco)
Fundamentals	OOP · REST APIs · layered architecture · unit testing (JUnit 5, Mockito) · UI/UX · Agile (Scrum) · UML · data structures

EDUCATION & LANGUAGES

Associate Degree in Systems Analysis and Development · FACENS, Sorocaba, Brazil · 2025 – Jun 2027 (expected)

Languages: Portuguese (native) · English (B2) · Spanish (intermediate, strong comprehension) · Japanese (A1)
